

WT Wall Panel

Product Description

The wall panels are suitable for use on walls due to the system that conceals joint elements. The ability to use them both laterally and vertically provides assembly flexibility and good solutions for designers. Generally produced in micro pressed form to achieve an aesthetic appearance for walls. The stone wool filler provides the best fire resistance performance.

Production Location

Balıkesir

Joint Details

Transportation and protection of sandwich panel

During hoisting take precaution for the sling.

Do not drag panel's in a pile, or on the roof purlins. Lift panel's from both ends when moving or laying in place.

Panel's to be stored on site for long periods should be stacked in covered areas. Wherever possible, always place stacks preferably on wooden wedges, against ground water.

For shorter periods stacks should be arranged on sloppy areas with a simple scaffolding and polyethilen coverleaving space for ventilation. Place stacks on a simple wedge.

Do not walk on panels.
